KAMISADO

It's you against your opponent in a game of pure skill and strategy! The aim in *Kamisado* is to be the first to get your tower to the opposite side of the board. It sounds easy, but the twist is that you can only move a tower if its color matches the color of the square that your opponent last moved to. Also, you will find that the routes you want to use are blocked by enemy towers (and sometimes your own!). As the game unfolds, your towers will be promoted to 'Sumos', and will have the ability to push your opponents pieces backwards, earning you extra turns. The situations continue to become more complex and challenging, until one player accumulates the required winning total and can be declared a *Kamisado* Grand Master - until the next game!
