EMPIRE ENGINE

Once, the world of Mekannis was united and prospered under the guidance of the Great Engine - an enormous thinking machine built into the molten heart of the world. Over millennia, Mekannis was transformed until every piece of land was incorporated into the gears and levers of the Engine itself. But, an act of hubris by the world's rulers caused a series of devastating malfunctions that shattered the land and the death of the Great Engine. Now four empires rise to dominance: the Kestrel Dominion, Nova Centralis, the Sylphian Commonwealth, and the Grail Prelacy. Each empire vies to fulfill the prophecy and restore the Great Engine, the source of ultimate power. As gears turn, empires are forged! Scheduled to ship in November 2014.

FIRE IN THE LAKE -
INSURGENCY IN VIETNAM

Vietnam, 1964. The most wrenching US engagement of the Cold War would be far more than GI versus Charlie. It set tribesman against nationalist, Buddhist against Catholic, mandarin against villager, and Northerner against Southerner - even among the communists. To get out, the US counterinsurgency would motor deeper and deeper in. In the end, culture and will would overcome technology and math to end the primacy of industrial might in modern warfare. Diving headlong into the momentous and complex battle for South Vietnam, *Fire in the Lake* takes players on US airborne sweeps of the jungle, Communist infiltration of the South, Trail interdiction, and air defense of the North, as well as allied conferences, Saigon politics, graduated escalation, and media war. GREAT CAMPAIGNS OF THE THIRTY YEARS WAR: WON BY THE SWORD

The war raged across Germany from 1618 to 1630 with the Habsburg, Holy Roman Emperor retaining the upperhand. Then the tide of war changed when King Gustav Adolf of Sweden, the "Lion of the North," revitalized the cause of the Protestant princes of Germany. Bankrolled by France, the Swedes pushed their advantage towards the Emperor's most valuable ally, Maximilian of Bavaria. Though Catholic, France sought to keep the power of the Habsburgs in check by financially supporting the Swedish King. From 1632 to 1648, Bavaria and the surrounding area became a crucial battlefield to knocking Bavaria out of the war. The first game in Ben Hull's *Great Campaigns of the Thirty Years War* series, *Won by the Sword* is a two-player game of operational warfare in the 17th Century. Scheduled to ship in August 2014.

NIGHT OF THE GRAND OCTOPUS

Long ago, the Grand Octopus, one filled with cosmically divine powers, reigned over the entire world - until an unfortunate combination of circumstances imprisoned it at the bottom of the ocean. Idle under miles of water, it fell asleep dreaming of the day when its time would come once again. In *Night of the Grand Octopus*, you are one of the Elect and have been recruited by the Illuminati to form a cult to glorify the tentacled one. What's more, your dreams have told you that the time has come - the stars have aligned so that you can perform the "Ritual of Appeal" and bring the Grand Octopus to surface once again. To perform the ritual, however, you need the right magical components, components to be found in a famous English university for young wizards and witches - and you're not the only one seeking them!

PANDEMIC: THE CURE

In *Pandemic: The Cure*, a stand-alone, dice-based version of the award-winning *Pandemic* board game, four diseases threaten the world and it falls to your team to save humanity. Players take on different roles, each with its own unique set of dice and abilities, and must take advantage of their specializations if they have any hope of (surviving!) winning the game. If, at any time, a region is infected with more than three dice of a given color, an outbreak occurs, spreading disease into an adjacent region. If too many outbreaks take place, or the rate of contamination gets too high, all the players lose. If, however, the players can discover the cures to the four diseases, humanity endures...until the next epidemic! Scheduled to ship in October 2014.
